By Emily C. Browne

WASHINGTON, Nov. 11 (AP) — The Justice Department and a federal judge are at odds over whether to correct a list of names that the government says are "erroneous" Social Security Administration (SSA) numbers (SALNs) that were used to identify a group of people who were arrested in 1987.

The Justice Department, which is leading the investigation, says that the list of names is "erroneous" because it contains the names of people who were not arrested in 1987. The company, which is a subsidiary of the Metropolitan Waterworks and Sewerage Board, says the new facilities will allow it to deliver up to 10 million gallons of water daily to the island. Figure 1. A schematic diagram of the experimental setup for the study of the effect of the initial concentration of the reactants on the rate of the reaction. The reaction mixture is placed in a beaker, and the reaction is initiated by the addition of a catalyst. The reaction is monitored by the change in the color of the solution, which is recorded by a colorimeter. The reaction is stopped by the addition of a stop solution, and the final color is recorded. The reaction is repeated for different initial concentrations of the reactants, and the rate of the reaction is determined from the change in the color of the solution over time.

Why electric cars are losing their aura

BY JIMMY KATZ

THE FIRST TIME I saw a Toyota Prius, I was struck by its sleek, aerodynamic design. It was a small, four-door car with a distinctive front end that looked like a fish. I was in a parking lot in Los Angeles, and the car was parked next to a red sports car. The Prius was a dark color, and it stood out from the other cars in the lot. I walked over to it and looked at it from all angles. It was a very different car from anything I had ever seen before. I was intrigued by its design and the fact that it was an electric car. I had heard about electric cars, but I had never seen one in person. I was curious to know more about it.

I asked the owner of the car, a man in a dark suit, about the car. He told me that it was a 1997 Toyota Prius, and that it was the first one he had ever owned. He said that he had bought it because he wanted a car that was different from the others. He said that he had heard that the Prius was a good car, and that he wanted to see if it was true. He said that he had been driving it for a while, and that he was very happy with it. He said that it was a very quiet car, and that it was very easy to drive. He said that it was a very reliable car, and that it was very safe. He said that it was a very good car, and that he was very proud of it.

I asked him how much it cost. He said that it cost \$15,000. I asked him if he had any other cars. He said that he had a red sports car, but that he didn't like it as much as the Prius. He said that he had been driving it for a while, and that he was very happy with the Prius. He said that it was a very good car, and that he was very proud of it.
